Professional Summary

I'm a Software Development student at Ara Institute of Canterbury with hands-on experience building web and mobile applications using React, React Native, TypeScript, JavaScript, Python, PHP, C#, .NET and SQL. I am continuously developing skills, willing to learn and apply best practices following clean Architecture, Test-Driven Development (TDD) and Agile, Scrum methodologies to develop maintainable software. I am currently seeking Software Engineering Internship, Graduate or Junior developer opportunities where I can contribute practical development skills and continue growing as a software engineer.

Technical Skills

- **Programming:** TypeScript, JavaScript, Python, PHP, C#, SQL, HTML5, CSS
- **Software Engineering Concepts:** Object Oriented Programming, SOLID principles, DRY, Clean architecture, Agile, Scrum.
- **Frameworks :** React, React Native, Vite, Tailwind CSS, Django, ASP.NET
- **Databases :** MySQL, SQL Server, IndexedDB, AsyncStorage
- **Testing :** Jest, Unit Testing, Test-Driven Development (TDD), Behavior Driven Development
- **Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, Expo
- **UI/UX & Prototyping:** Figma, Wireframing, High-Fidelity Prototyping, Responsive Design
- **AI & Agentic Engineering :** Prompt, Context Engineering, AI Agentic Workflows and Integration

Key Competencies

Problem Solving & Analytical Thinking

- Apply structured problem-solving through software development projects, including debugging and designing application logic, working with APIs and managing state and data persistence.
- Adapt between different programming languages, AI tools, development environments, testing and implementation according to project requirements and solutions
- Performed a thematic analysis of the reasons IT projects fail, identifying recurring themes and contributing factors and using the findings to support evidence-based conclusions.

Teamwork & Collaboration

- Contribute to academic software development projects on software development projects using Agile, Scrum, Kanban, Design Thinking and Git version control practices.
- Collaborate with team members to meet daily operational targets in a fast-paced environment.
- Work effectively with people from diverse backgrounds through experience in IT support, hospitality and warehouse environments.

Communication & Interpersonal Skills

- Communicate technical concepts, ideas and project decisions through coursework, documentation, demonstrations and sprint retrospectives.
- Effective written and verbal communication skills developed through study and work journey
- Developed strong interpersonal and customer service skills working in hospitality and customer-facing environments
- Comfortable asking questions, listening to feedback and working collaboratively when learning new tools or solving problems.

Organisation & Attention to Detail

- Apply attention to detail when writing and verifying code, debugging applications, maintaining technical documentation and working with structured data
- Manage multiple projects, course work and Organise development tasks systematically and track through Kanban boards, time management, sprint and tasks planning.

Selected Software Projects

Budget Tracker Pro (React Native, Expo, TypeScript)

- Developed a cross-platform budgeting application supporting income, expenses, budgets, recurring payments and financial goals
- Structured the application using Clean Architecture and Test-Driven Development using Jest unit tests.
- Implemented local data persistence with AsyncStorage.

Campus Event Planner (React, Vite, TypeScript)

- Built a Progressive Web Application for campus event management.
- Implemented CRUD operations, search, sorting, filtering and offline support.
- Used IndexedDB for persistence.

Fruit Finder Christchurch (JavaScript, LeafletJS)

- Developed an interactive GIS mapping application.
- Integrated Christchurch City Council GeoJSON data.
- Implemented route planning and responsive mobile-first design.

Health Management Referral System (Python, Django, MySQL)

- Built a healthcare referral management system with CRUD functionality.
- Designed relational database using MySQL.

Education and Qualifications

Bachelor of Information and Communication Technology (Software Development)

Ara Institute of Canterbury, Christchurch | 2025 – Present

New Zealand Diploma in Systems Administration (Level 6)

Aspire2 International Business & Technology | 2020 – 2021

Professional Experience

Store Person | Foodstuffs South Island | Aug 2024 – Present

- Process customer orders accurately in a fast-paced warehouse environment.
- Collaborate with team members to achieve daily operational targets.
- Maintain high attention to detail and workplace safety.

Cafe Assistant | Unknown Chapter Coffee Roasters | Jan 2020 – Jul 2024

- Worked effectively with colleagues in a busy kitchen environment
- Delivered excellent customer service in busy hospitality environment

IT Administrator | S V Associates Pvt Ltd | Aug 2013 – Dec 2019

- Installed and maintained Windows-based IT systems.
- Managed user accounts, permissions and software installations.
- Provided hardware, software and network troubleshooting.
- Supported staff and maintained technical documentation.
